

TPM IN DUBLIN

On 16 and 17 September 2024, our Irish partners from I&F hosted a productive meeting in Dublin (Ireland) focused on advancing our road safety initiative for bicycles and electric scooters in Primary Schools. During the sessions, participants reviewed all deliverables completed to date, including a thorough examination of the Road Safety Manual.

WHAT'S NEXT?

The next steps involve creating educational videos with school children's participation, which will support the interactive workshops scheduled to launch in the New Year.

Our next project gathering will take place in Prague this December, where partners will come together for an intensive Training Week.

ABOUT US...

Through the e-Green project, we're empowering the next generation to embrace road safety, blending fun with essential learning. By teaching safe cycling and scooter habits to children aged 6-12, we're not only making streets safer but also nurturing lifelong, responsible road users.

WORK PACKAGE N°3 - AUDIOVISUAL RESOURCES FOR PRIMARY SCHOOLS

This result aims to create six engaging, student-produced videos on road safety for bicycles and scooters, aligned with the project's Road Safety Manual. These videos will help primary students across Europe by providing practical safety examples and will be translated, subtitled, and shared widely to promote safe riding practices.
