

## LT TA IN PRAGUE

From December 11–13, 2024, our Egreen team gathered in wintry Prague for a three-day LT TA packed with icebreaker games, role-playing road-safety scenarios, and hands-on design sprints to create playful teaching tools. Between mock “street” simulations and prototype testing, we discovered how interactive games can transform bicycle- and scooter-safety lessons. Big thanks to MiseHero for flawless organization and to Synergia, Villafuente, Prism, and I&F Education for making this learning adventure so inspiring!

## ABOUT US...

Through the e-Green project, we're empowering the next generation to embrace road safety, blending fun with essential learning. By teaching safe cycling and scooter habits to children aged 6-12, we're not only making streets safer but also nurturing lifelong, responsible road users.

## WORK PACKAGE N°4 - TRAINING FOR TEACHERS AND ROAD SAFETY CAMPAIGN

The road safety campaign in schools aims to raise awareness among students of the importance of road safety and the risks associated with unsafe road practices.

This will help to change behaviour and attitudes towards road safety, ultimately leading to a reduction in accidents involving children on the roads.
