

## FINAL TPM IN CÓRDOBA

On Day 1, Villafuente welcomed everyone at the Baobab building, and each partner shared progress on their school workshops—from Italy's five sessions to upcoming Czech events at the June 7 bike fair. We then dove into the final tweaks on our teacher manual and educational videos, refined the workshop-and-campaign structure, and aligned on quality checks and dissemination plans.

### WHEN WAS IT?

From June 4–5, 2025, our Egreen partners gathered in sunny Córdoba for the project's final TPM.

## WHAT'S NEXT?

Next, each partner will roll out the workshops in their national schools (just as we did on Day 2 in Córdoba) combining one hour of video-based theory with an hour of hands-on bike and scooter drills to bring road-safety learning directly to students across our countries.

## DAY 2

Day 2 saw us at Seneca Primary School, where two hands-on workshops blended one hour of video-based theory with an hour of practical bike-and-scooter drills in the schoolyard.

The students' enthusiasm was infectious, and the partnership took detailed notes for future roll-outs. We wrapped up by presenting certificates to all participants.

Big thanks to Villafuente for the warm hosting, and to Synergia, Prism, I&F Education, and MiseHero for their collaboration in making our Córdoba meeting a fitting finale!
